Statutory auditor's report
For the financial year ended 31 December 2010

Free translation of a French language original

This is a free translation into English of the statutory auditors' report on the financial statements issued in French and it is provided solely for the convenience of English-speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the opinion on the financial statements and includes an explanatory paragraph discussing the auditor's assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions, or disclosures. This report also includes information relating to the specific verification of information given in the management report and in the documents addressed to shareholders. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

Dear Sir/Madam,

In accordance with the mission assigned to us by the management body of the fund's management company, we present our report for the financial year ended 31 December 2010 relative to:

- the audit of the annual financial statements of the **CARMIGNAC PROFIL REACTIF 75** FCP which are attached to the present report,
- the justification of our evaluations,
- specific verifications and information required by law.

The annual financial statements were prepared by the management company. Our role is to express an opinion on these financial statements based on our audit.

I – OPINION ON THE ANNUAL FINANCIAL STATEMENTS

We conducted our audit in accordance with the professional auditing standards applicable in France. These standards require that we carry out our audit in order to obtain reasonable assurance about whether the annual financial statements are free of material misstatement. An audit consists in examining, on a test basis or by other methods of selection, evidence supporting the amounts and disclosures contained in the annual financial statements. An audit also consists in assessing the accounting principles used and the significant estimates made, as well as the overall presentation of the financial statements. We believe that the evidence gathered is pertinent and sufficient to serve as a basis for our opinion.

In our opinion, the annual financial statements give, in accordance with French accounting rules and principles, a true and fair view of the Fund's financial position and assets and liabilities and of the results of its operations at the end of the financial year.

II – JUSTIFICATION OF THE EVALUATIONS

In application of the provisions of Article L.823-9 of the French Commercial Code in relation to the justification of our evaluations, we wish to highlight the following points:

As part of our evaluation of the accounting principles used by the Fund and described in the notes to the annual financial statements under “Accounting methods and rules”, we have verified the correct application of the valuation methods used for the financial instruments in the portfolio.

The evaluations were made in the context of our audit of the annual financial statements, taken as a whole, and therefore contributed to the formation of the opinion expressed in the first part of this report.

III – SPECIFIC VERIFICATIONS AND INFORMATION

We have also carried out the specific verifications required by law in accordance with the professional auditing standards applicable in France.

We have no comment as to the fair presentation and conformity with the annual financial statements of the information given in the annual report and in the documents sent to unitholders with respect to the financial position and the annual financial statements.

CARMIGNAC PROFIL REACTIF 75 2010 ANNUAL REPORT

■ Main features of the Fund

Classification

Balanced

Fund of Funds (UCITS)

More than 50% of the net assets

Dividend policy

Accumulation fund Dividends are recorded on a cash basis.

Countries in which the Fund is authorised for distribution

Belgium, France, Germany, Italy, Luxembourg, Netherlands, Spain and Switzerland.

Investment objective

The Fund is managed on a discretionary basis with an active asset allocation policy and is invested in international stocks. The Fund's objective is to achieve positive performance on an annual basis with a risk profile comparable to that of its performance indicator, which comprises 75% MSCI AC World Free index, converted into euro, +25% Citigroup WGBI All Maturities EUR index. The Fund aims to keep volatility below the annual volatility of its performance indicator.

Performance indicator

The Fund's performance indicator is the following composite index: 75% MSCI AC World Free index, converted into euro, +25% Citigroup WGBI All Maturities EUR index.

This composite index does not strictly define the investment universe but allows the investor to assess the performance and risk profile that they can expect when investing in the Fund. The market risk of the Fund is comparable to that of its performance indicator.

Description of the MSCI AC World Free index: the performance indicator for the equity component is the Morgan Stanley Capital Investment All Countries World Free index, converted into euro. It is calculated ex-dividend in dollars by Morgan Stanley (Bloomberg code: MSEUACWF) and converted into euro. This index includes around 2,402 stocks representing international companies (data at 30 September 2004).

Description of the Citigroup WGBI All Maturities EUR index: the performance indicator of the bond component is the Citigroup WGBI All Maturities EUR index. It is calculated ex-dividend in euro by Citigroup (Bloomberg code: SBWGEU). This index includes around 654 securities representing international bond issuers (data at 30 September 2004).

Investment strategy

The investment policy takes into account the principle of risk spreading by means of the diversification of investments.

The Fund is a fund of funds invested primarily in UCITS managed by CARMIGNAC GESTION. The average investment in units or shares of UCITS and the allocation between the different asset classes shall depend on market conditions and portfolio diversification opportunities, and shall be determined on a discretionary basis by the management company. Subject to the regulatory investment limits, investments in UCITS shall account for between 50% and 100% of the net assets.

The Fund shall regularly invest in UCITS specialised in the emerging markets.

The Fund may invest in external UCITS when the desired allocation cannot be achieved exclusively through investment in UCITS managed by CARMIGNAC GESTION.

Stock selection is based on detailed financial analysis, meetings organised by companies, visits to these companies and daily news. Depending on the situation, the criteria used for stock selection are the value of the assets, return, growth and quality of the management, in particular.

Up to 75% of the net assets of the FCP may be invested in and/or exposed to equity UCITS or equities and other securities giving or capable of giving, directly or indirectly, access to capital or to voting rights, traded on eurozone and/or international markets, including a potentially significant portion in the emerging countries (without, however, exceeding 25% of the net assets).

In order for the manager to diversify the portfolio, the assets of the FCP may be invested in, inter alia, eurozone and/or international fixed rate bonds, transferable debt securities, variable rate bonds and inflation-linked bonds, including a potentially significant portion in the emerging countries (without, however, exceeding 25% of the net assets).

The Fund intends to invest between 50% and 100% of its net assets in UCITS managed by CARMIGNAC GESTION.

The manager may invest in futures and options traded on eurozone and/or international regulated or over-the-counter markets.

The maximum commitment of these derivative transactions shall be limited to the total value of the Fund's assets at any time.

The manager may invest in eurozone and/or international convertible bonds including those of the emerging countries, without, however, exceeding 25% of the net assets.

The manager may invest from time to time in securities with embedded derivatives (warrants, credit link notes, EMTN, certificates indexed on the volatility of the equity markets) traded on regulated or over-the-counter eurozone and/or international markets. In all cases, the amounts invested in securities with embedded derivatives may not exceed 10% of the net assets.

The FCP may use deposits and cash borrowings to optimise its cash management.

The FCP may enter into securities lending transactions on a limited basis in order to optimise its income.

Risk profile

The Fund shall invest in UCITS and financial instruments selected by the Management Company. These UCITS and financial instruments shall be subject to the evolution and fluctuations of the market.

The risk profile of the FCP is suitable for an investment horizon of over 5 years.

Like any financial investment, potential investors should be aware that the value of the Fund's assets is subject to the fluctuations of the international equity and bond markets and that it may vary substantially. Unitholders receive no guarantee that they will get back the invested capital.

The risk factors described below are not exhaustive. It is up to each investor to analyse the risk associated with such an investment and to form his/her own opinion independent of CARMIGNAC GESTION, where necessary seeking the opinion of any advisors specialised in such matters in order to ensure that this investment is appropriate in relation to his/her financial situation.

The discretionary management style is based on expectations regarding the performance of different markets (equities, bonds). There is a risk that the Fund might not be invested in the best-performing markets at all times.

Equity risk: the level of exposure to equity risk may vary from 0% to 75% of the net assets, part of which shall be exposed to the international and emerging markets. The Fund is exposed to the European and international equity markets through investment predominantly in UCITS managed by CARMIGNAC GESTION and, where applicable, direct investment in financial instruments. The Fund is exposed to equity risk across geographical zones (Europe, international, the emerging countries) and capitalisation types (large, mid, small) as well as to convertible bond risk (similar to equity risk).

Investors in France are reminded that the operating and supervision conditions of the emerging markets may deviate from the standards prevailing on the large international markets.

Interest rate risk: up to 100% of the net assets of the Fund is exposed to the interest rate risk of the eurozone and international markets through investments in UCITS and/or direct investments in financial instruments. Investments in fixed rate bonds or other fixed income securities may record negative performances as a result of interest rate fluctuations.

Credit risk: the manager may invest in UCITS whose rating is below investment grade. The average rating of the bonds held directly by the Fund or through investment in UCITS shall be at least investment grade (i.e. rated at least BBB-/Baa3 by the rating agencies Standard & Poor's and Moody's).

Currency risk: the FCP is exposed to currency risk through the purchase of securities and/or UCITS denominated in currencies other than the euro or indirectly through the purchase of UCITS denominated in euro whose underlying investments are not hedged against currency risk as well as through currency forward exchange contracts.

Cash: the markets in which the FCP participates may occasionally be subject to temporary illiquidity. These market distortions may have an impact on the pricing conditions under which the FCP might be caused to liquidate, initiate or modify its positions.

Risk of capital loss: the FCP does not guarantee or protect the capital invested.

Target subscribers and investor profile

All investors

The appropriate investment amount depends on your personal situation. To determine their level of investment, investors are invited to seek professional advice in order to diversify their investments and to determine the proportion of their financial portfolio or their assets to be invested in this FCP relative to, more specifically, the recommended investment period and exposure to the aforementioned risks, their personal assets, their needs and their own objectives.

The recommended investment period is 5 years.

■ Investment policy

Management report

For the financial year ended, Carmignac Profil Réactif 75 posted a performance of +14.34%, compared with +16.69% for its performance indicator. After underperforming its indicator during the first few months of the year, the Fund outperformed its indicator over the following two quarters before slipping back again at the end of the year. This performance can be explained by the strength of its equity investments and specialist funds in particular. However, the lack of yen-denominated investments in the underlying funds and its increased dollar exposure (via forward exchange transactions) weighed on the Fund's full-year performance.

Our asset allocation, based on a balance between European high-visibility, non-cyclical securities on the one hand and the theme of emerging domestic growth and the resulting rise in commodity demand on the other, was the source of performance over the year. The main contributors to performance were thus our specialist (+10.6%), emerging (Carmignac Emergents and Carmignac Emerging Discovery) and commodity funds (Carmignac Commodities), accounting for a significant portion of the portfolio, with an average weighting of almost 32% over the year. Our emerging funds, which generated performances of +30.94% and 32.59% respectively over the year, benefited from a pertinent selection of stocks in the consumer staples, consumer discretionary and materials sectors. Bolstered by the rise in oil services and base and precious metals, Carmignac Commodities recorded an annual performance of +42.02%, which in turn benefited the Fund. Our European funds – Carmignac Euro-Entrepreneurs and Carmignac Grande Europe – did not let us down (average weighting of 15% and a contribution of 2.5% to performance) despite particularly volatile markets in the eurozone. The composition of the portfolio changed slightly over the year. Although we increased the weighting of our emerging and commodity funds in March, it was revised downwards slightly at the end of the year to counter persistent inflation fears in emerging countries. Bond funds (8.4% of assets on average) made a positive contribution of 0.4% to performance.

At a tactical level, the Fund of Funds was penalised by its forward exchange positions and overexposure to the dollar in particular (via forward exchange contracts) during part of the year. Forward currency transactions as a whole contributed negatively to the performance of the Fund of Funds, costing it 3.2%. Additional derivatives positions, such as gold options, enabled us to offset part of these losses. Finally, our Fund of Funds' equity risk exposure was regularly adapted during the year enabling it to generate performance in different market conditions. Derivatives positions as a whole, excluding currency derivatives, made a positive contribution of 2.1% to the Fund's performance. While Carmignac Profil Réactif 75 began the year with a defensive stance, we revised its level of exposure to 70% at the end of December.

Past performance is not an indication of future results.

■ Regulatory information

Policy for the selection of intermediaries

"In its capacity as management company, Carmignac Gestion selects service providers whose execution policy guarantees the best possible result when executing orders transmitted on behalf of its UCITS or its clients. It also selects service providers to aid in making investment decisions and to execute orders. In both cases, Carmignac Gestion has defined a policy for selecting and evaluating intermediaries according to certain criteria. You can find the updated version of this policy at www.carmignac.com, where you will also find a report on intermediary fees.

Life of the Fund

None.

■ Miscellaneous

Indirect fees of target UCITS

The Fund invested in UCITS whose total fees did not exceed the limits set out in the prospectus:

- management fee: 2% of the net assets, inclusive of tax.
- subscription fee: 1% inclusive of tax.
- redemption fee: 1% inclusive of tax.

ANNUAL FINANCIAL STATEMENTS OF CARMIGNAC PROFIL REACTIF 75

■ Accounting methods and rules

The annual financial statements are established in accordance with the provisions laid down in Accounting Regulatory Committee (CRC) regulation no. 2003-02, as amended, with regard to the accounting guidelines applicable to UCITS.

The general principles of accounting apply:

- a true and fair view, comparability, continuity of operations,
- lawfulness and fairness,
- prudence,
- consistency of methods from one financial year to the next.

Income from fixed income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded exclusive of costs.

The accounting currency of the portfolio is the euro.

There are 12 months in the financial year.

Valuation rules for the assets:

Financial instruments are recorded in the financial statements using the historical cost method and they are entered on the balance sheet at their current value as determined by the last-known market value or, where a market does not exist, by any external means or by using financial models.

Differences between the current values used to calculate the net asset value and the historical costs of transferable securities when first included in the portfolio are recorded in “valuation differentials” accounts.

Securities that are not denominated in the currency of the portfolio are valued in accordance with the principle described below; the valuation is then converted into the currency of the portfolio on the basis of the exchange rate prevailing on the valuation day.

Deposits:

Deposits with a residual maturity of less than or equal to 3 months are valued using the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the last market price of the day.

Bonds and other similar securities are valued at the closing price supplied by various financial service providers. Interest accrued on bonds and other similar securities is calculated up to the date of the net asset value.

French government bonds are valued on the basis of the mid price of a contributor (a primary dealer selected by the French Treasury), supplied by an information server. This price is subject to a reliability check by means of a comparison with the prices of several other primary dealers.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued by the management company using methods based on the market value and the yield, while taking account of recent prices observed for significant transactions.

Transferable debt securities:

Transferable debt securities and similar securities that are not traded in large volumes are valued on the basis of an actuarial method, the reference rate (as defined below) being increased, where applicable, by a differential representative of the intrinsic characteristics of the issuer:

Transferable debt securities with a maturity of less than or equal to 1 year: Interbank rate in euro (Euribor),

Transferable debt securities with a maturity exceeding 1 year: valued using rates for French treasury bills (BTAN and OAT) with similar maturity dates for the longer durations.

Transferable debt securities with a residual maturity of less than three months may be valued using the straight-line method.

French treasury bills are valued on the basis of market prices, as published daily by the Bank of France.

UCITS held by the Fund:

Units or shares of UCITS shall be valued at their last known net asset value.

Temporary transactions on securities:

Securities received under repurchase agreements are recorded as an asset under the heading "Receivables on securities received under a repurchase agreement (*pension*)" at the contract amount, plus any accrued interest receivable.

Securities transferred under a repurchase agreement are recorded as securities purchased at their current value. The payables on securities transferred under a repurchase agreement are recorded as securities sold at the value determined in the contract, plus any accrued interest payable.

Securities lent are valued at their current value and are recorded as an asset under the heading "Receivables on securities lent" at their current value, plus any accrued interest receivable.

Securities borrowed are recorded as an asset under the heading "Securities borrowed" at the contract amount and as a liability under the heading "Payables on securities borrowed" at the contract amount, plus any accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the settlement price of that day.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value by discounting future interest payments at the interest rate and/or currency exchange rate prevailing on the market. This price is adjusted to the issuer's risk.

Index swaps are valued using an actuarial method on the basis of a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the terms and conditions determined by the management company.

Off-balance sheet commitments:

Futures contracts are recorded at their market value as off-balance sheet commitments on the basis of the price used in the portfolio.

Options are converted into the underlying equivalent.

Swap commitments are recorded at their nominal value or, where there is no nominal value, at an equivalent amount.

Financial instruments:

Name	Description
CME NIKEI 225 J 0311	Nikkei 225 Future
EUR DJE 600 BAS 0311	Euro Stoxx 600 Basic Resources Future
JPM KOSPI 0311	Korea Index Future
NIFTY JPM 0111	India Index Future
S&P500 MINI 0311	S&P 500 Future
EUR EUREX EUROS 0311	Euro Stoxx 50 Future

Management fees:

Management fees are calculated on each valuation day on the basis of the net assets.

These fees are recorded in the Fund's income statement.

The management fees are paid in full to the Management Company responsible for all of the operating costs of the Funds.

Management fees do not include transaction fees.

The rate applied to the net asset value of the previous day is 1% (inclusive of tax).

The variable management fees are calculated according to the following method:

If the performance since the beginning of the financial year is positive and exceeds 7.50% on an annual basis, a daily provision of 10% of this outperformance is established.

In the event that the level of this outperformance decreases, a daily amount corresponding to 10% of this underperformance is deducted from the provision accumulated since the beginning of the year.

This provision is deducted annually from the last net asset value of the month of December by the management company.

Dividend policy:

The net profit/loss for the financial year is equal to the amount of interest, arrears, dividends, premiums and prizes, plus income generated by temporary cash holdings. Management fees and payables on financial transactions are charged against this income. Realised or unrealised gains or losses, as well as subscription and redemption fees, do not constitute income.

Distributable income is equal to the net income for the financial year plus retained earnings, plus or minus the balance of the income equalisation accounts for the last financial year.

In accordance with the provisions of the full prospectus, distributable income shall be accumulated in full by the Fund.
