Statutory Auditor's Certification

STATUTORY AUDITOR'S REPORT
ON THE ANNUAL FINANCIAL STATEMENTS
Financial year ended 30 December 2022

CARMIGNAC PROFIL REACTIF 50
UCITS IN THE FORM OF A FRENCH MUTUAL FUND (FCP)
Governed by the French Monetary and Financial Code

Management company
CARMIGNAC GESTION
24, place Vendôme
75001 PARIS

Opinion

In accordance with the assignment entrusted to us by the management company, we have audited the annual financial statements of CARMIGNAC PROFIL REACTIF 50, a UCITS constituted in the form of a French mutual fund (FCP), for the financial year ended 30 December 2022, as they are appended to this report.

In our opinion, the annual financial statements give, in accordance with French accounting rules and principles, a true and fair view of the financial position and assets and liabilities of the fund and of the results of its operations at the end of the financial year.

Basis for our opinion

Audit framework

We conducted our audit in accordance with the professional auditing standards applicable in France. We believe that the evidence gathered is pertinent and sufficient to serve as a basis for our opinion. Our responsibilities in light of these standards are described in this report in the section entitled "Responsibilities of the statutory auditor in relation to auditing the annual financial statements".

Independence

We carried out our audit in accordance with the independence rules set out in the French Commercial Code and the Code of Ethics for Statutory Auditors, for the period from 1 January 2022 to the date on which our report was issued.

*PricewaterhouseCoopers Audit, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex

Accounting firm registered with the Order of Paris – Ile de France. Auditing firm, member of the Compagnie Régionale de Versailles A simplified joint stock company with a capital of €2,510,460. Registered office: 63, rue de Villiers 92200 Neuilly-sur-Seine. RCS Nanterre 672 006 483. VAT no. FR 76 672 006 483. Siret 672 006 483 00362. APE code 6920 Z. Offices: Bordeaux, Grenoble, Lille, Lyon, Marseille, Metz, Nantes, Nice, Paris, Poitiers, Rennes, Rouen, Strasbourg, Toulouse.

Justification of the evaluations

In accordance with the provisions of Articles L.823-9 and R.823-7 of the French Commercial Code in relation to the justification of our evaluations, we wish to highlight that the evaluations which, in our professional opinion, were the most significant in our audit of the annual financial statements, concerned the appropriateness of the accounting principles applied and the reasonableness of the significant estimates made and the overall presentation of the financial statements.

The evaluations were made in the context of the audit of the annual financial statements, taken as a whole, and the formation of the opinion expressed herein. We offer no opinion on parts of these annual financial statements taken in isolation.

Specific verifications

We have also carried out the specific verifications required by laws and regulations in accordance with the professional auditing standards applicable in France.

We have no comment as to the fair presentation and conformity with the annual financial statements of the information given in the management report drawn up by the management company.

Responsibilities of the management company regarding the annual financial statements

The management company is required to prepare annual financial statements that present a true and fair image, in accordance with French accounting rules and principles, and to establish the internal control measures that it deems necessary for producing annual financial statements free of material misstatement, whether due to fraud or error.

When producing the annual financial statements, it is incumbent on the management company to assess the ability of the fund to continue operating, and where appropriate to include the necessary information on business continuity, and apply the going concern accounting policy unless there are plans to liquidate the fund or cease trading.

The annual financial statements were prepared by the management company.

Responsibilities of the statutory auditor when auditing the annual financial statements

Audit objective and approach

We are required to produce a report on the annual financial statements. Our aim is to gain reasonable assurance that the annual financial statements taken as a whole are free of material misstatement. Reasonable assurance means a high level of assurance, albeit without any guarantee, that an audit carried out in accordance with industry standards could systematically detect every material misstatement. Misstatements may arise from fraud or error, and are considered to be material when one could reasonably expect them, either individually or cumulatively, to influence the financial decisions that readers make as a result.

As stipulated in Article L.823-10-1 of the French Commercial Code, our role as auditors is not to guarantee the viability or quality of management of the fund.

A statutory auditor exercises its professional judgement throughout any audit performed in accordance with professional standards applicable in France. Furthermore:

- It identifies and evaluates the risk that the annual financial statements may include material misstatement, whether resulting from fraud or error, defines and implements auditing procedures in response to these risks, and gathers the items it deems sufficient and appropriate as a basis for its opinion. The risk of material misstatement not being detected is considerably higher when it is the result of fraud rather than error, since fraud may involve collusion, falsification, voluntary omissions, false declarations or the circumvention of the internal control system;

- It assesses the internal control system that is relevant for the audit in order to define audit procedures that are appropriate in the circumstances, and not for the purpose of expressing an opinion on the internal control system;
- It evaluates the appropriateness of the accounting methods used and the reasonableness of the accounting estimates made by the management company, as well as the related information in the annual financial statements;
- It evaluates the appropriateness of the management company's application of the going concern accounting principle and, based on the information gathered, the existence or absence of significant uncertainty linked to events or circumstances likely to cast doubt on the fund's ability to continue its operations. This evaluation is based on the information gathered prior to the date of its report; however, it should be noted that subsequent circumstances or events may cast doubt on the continuity of its operations. If it concludes that there is a material uncertainty, it draws readers' attention to the information provided in the annual financial statements regarding this uncertainty, or if such information is not provided or not relevant, it certifies the accounts with reservations, or refuses to certify them;
- It assesses the presentation of all of the annual financial statements and evaluates whether or not the annual financial statements depict the underlying operations and events fairly.

CARMIGNAC PROFIL REACTIF 50 2022 ANNUAL REPORT

Main features of the Fund

Allocation of distributable income

Distributable income	"Acc" units
Allocation of net income	Accumulation (dividends are recorded on a cash basis)
Allocation of net realised capital gains or losses	Accumulation (dividends are recorded on a cash basis)

Countries in which the Fund is authorised for distribution

A EUR Acc units: Austria, Belgium, Switzerland, Germany, Spain, France, Italy, Luxembourg, Netherlands and Singapore.

Investment objective

The fund aims to generate a positive annual return while keeping annual volatility below that of its reference indicator. It is managed on a discretionary basis by the portfolio manager, who pursues an active asset allocation policy, mainly involving funds invested in international equities and bonds.

Reference indicator

The Fund's reference indicator is the following composite index: 30% of the MSCI AC WORLD NR USD converted into euro (Bloomberg code: NDUEACWF) + 70% of the ICE BofA Global Broad Market Index EUR hdg (Bloomberg code: GBMI). It is rebalanced each quarter.

The MSCI AC WORLD NR (USD) index represents the largest international companies in developed and emerging countries. It is calculated by MSCI in dollars and with dividends reinvested, then converted into euro (Bloomberg code: NDUEACWF).

The ICE BOFA Global Broad Market Index (EUR) reflects the performance of investment grade bonds, including sovereign, quasi-sovereign and corporate bonds, and structured securities, issued on the main domestic markets and on the Eurobond market (Bloomberg code: GMBI)

This fund is an actively managed UCITS. An actively managed UCITS is one where the investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The fund's investment universe is totally independent of the reference indicator, the individual constituents of which are not necessarily representative of the assets invested in by the fund. The fund's investment strategy is not dependent on the reference indicator. Therefore, the fund's holdings and the weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation.

CARMIGNAC PROFIL REACTIF 50

MSCI and ICE Data Indices, which publish the indices that make up the reference indicator used to calculate the fund's outperformance, have not been entered in the register of administrators and benchmarks kept by ESMA since 1 January 2021, although this has no effect on the Fund's use of the reference indicator, in accordance with ESMA position 80-187-610. For more information on the MSCI AC WORLD NR (USD) index, please refer to the publisher's website: <https://www.msci.com>, and for more information on the ICE BofA Global Government index, please refer to the publisher's website: <https://indices.theice.com/>.

The management company may replace the reference indicator if one or more of the indices that make up this reference indicator undergo substantial modifications or cease to be published.

Investment strategy

STRATEGIES USED

The fund is invested primarily in funds managed by Carmignac. However, the fund may invest in external funds if the desired allocation cannot be achieved exclusively through investment in funds managed by Carmignac. The portfolio manager will favour fund units authorised for sale in France.

Investment in units or shares of investment funds and the allocation between the different asset classes shall depend on market conditions and portfolio diversification opportunities, and shall be determined on a discretionary basis by the management company, which will use a quantitative tool to strike the right balance between the risk attached to each investment and the expected return. Subject to the regulatory investment limits, investments in funds shall account for between 50% and 100% of the net assets.

As the fund is managed on an active, flexible basis, its asset allocation may differ substantially from that of its reference indicator. As such, the portfolio manager dynamically manages exposure to the different markets and eligible asset classes, based on expectations of changes in risk/return ratios. The investment policy takes into account the principle of risk spreading by means of the diversification of investments.

In addition to these long positions on the funds described above:

- The portfolio manager may take long positions on underlying assets eligible for the portfolio.
- The portfolio manager may also take short positions on underlying assets eligible for the portfolio if he or she feels that the market is overvaluing these underlying assets.
- The portfolio manager may also pursue relative value strategies by combining long and short positions on underlying assets eligible for the portfolio.
- Eligible underlying assets are those described in the paragraph "Description of asset categories and financial contracts as well as their contribution to the investment objective being achieved".

The investment universe for all strategies includes emerging markets within the limits stipulated in the section "Description of asset categories and financial contracts as well as their contribution to the investment objective being achieved".

Description of asset categories and financial contracts as well as their contribution to the investment objective being achieved

EQUITIES

Up to 50% of the net assets of the fund are exposed to equity funds or equities and other securities giving or capable of giving, directly or indirectly, access to capital or to voting rights, and traded on Eurozone and/or international markets, including a potentially significant portion in emerging countries (up to 100% of the equity portfolio).

The net assets of the fund may be invested in small, mid and large caps.

CARMIGNAC PROFIL REACTIF 50 DEBT SECURITIES AND MONEY MARKET INSTRUMENTS

Primarily through investment funds, between 30% and 100% of the fund's net assets are invested in (short- and medium-term) negotiable debt securities, money market instruments, and fixed or floating rate government or corporate bonds, which may be linked to inflation in the Eurozone and/or international markets. Up to 100% of the portfolio of debt securities and money market instruments may be invested in emerging markets.

As the fund is managed on a discretionary basis, no asset allocation constraints shall apply.

The portfolio manager reserves the right to invest directly or indirectly in debt securities and instruments that are rated below investment grade or are unrated. In the latter case, the company carries out its own analysis and assessment of creditworthiness.

The weighted average rating of the debt instruments held directly by the fund or through investment in funds is at least investment grade according to at least one of the major rating agencies.

In the case of direct investments in securities, the management company will carry out its own analysis of the risk/reward profile (profitability, creditworthiness, liquidity, maturity). As a result, the decision to buy, hold or sell a security (particularly where the agency rating has changed) is not solely based on the rating criteria, but also reflects an internal analysis of the credit risks and market conditions carried out by the management company.

There are no restrictions in terms of duration, modified duration or allocation between private and public issuers.

DERIVATIVES

The fund may invest in financial futures traded on Eurozone and international regulated, organised or over-the-counter markets, for the purpose of managing exposure, hedging or pursuing relative value strategies.

The derivative instruments liable to be used by the portfolio manager include options (vanilla, barrier, binary), futures, forwards, forward exchange contracts, swaps (including performance swaps) and CFDs (contracts for difference), involving one or more risks and/or underlying instruments (directly held securities, indices, baskets) in which the portfolio manager may invest.

These derivatives allow the portfolio manager to expose the fund to the following risks, while respecting the portfolio's overall constraints:

- Currencies,
- Fixed income,
- Equities (all caps),
- Dividends,
- Volatility and variance (up to 10% of the net assets),
- Commodities (exposure through eligible financial contracts for up to 20% of the net assets),
- And exchange-traded funds (ETFs) (financial instruments).

STRATEGY FOR USING DERIVATIVES TO ACHIEVE THE INVESTMENT OBJECTIVE

Derivatives of equities, equity indices and baskets of equities or equity indices are used to gain long or short exposure, or hedge exposure, to an issuer, group of issuers, economic sector, country or region, or simply adjust the fund's overall exposure to equity markets. They are also used to pursue relative value strategies, where the fund takes simultaneous long and short positions on equity markets, depending on the country, region, economic sector, issuer or group of issuers.

Currency derivatives are used to gain long or short exposure, hedge exposure to a currency, or simply adjust the fund's overall exposure to currency risk. They may also be used to pursue relative value strategies, where the fund takes simultaneous long and short positions on foreign exchange markets.

CARMIGNAC PROFIL REACTIF 50

Interest rate derivatives are used to gain long or short exposure, hedge interest rates, or simply adjust the portfolio's overall modified duration. Interest rate derivatives are also used to pursue relative value strategies, where the fund takes simultaneous long and short positions on different fixed income markets, depending on the country, region or yield curve segment.

Volatility or variance derivatives are used to gain long or short exposure to market volatility, to hedge equity exposure or to adjust the portfolio's exposure to market volatility or variance. They are also used to pursue relative value strategies, where the fund takes simultaneous long and short positions on market volatility.

Dividend derivatives are used to gain long or short exposure to the dividend of an issuer or group of issuers, or to hedge the dividend risk on an issuer or group of issuers. Dividend risk is the risk that the dividend of a share or equity index is not paid as anticipated by the market. They are also used to pursue relative value strategies, where the fund takes simultaneous long and short positions on equity market dividends.

Overall exposure to derivatives is controlled by combining leverage, defined as the sum of gross nominal amounts of derivatives without netting or hedging, with the fund's VaR limit (cf. section VI. "Overall risk").

Derivative transactions may be concluded with counterparties selected by the management company in accordance with its "Best Execution/Best Selection" policy and the approval procedure for new counterparties. These counterparties are credit institutions or investment companies established in a European Union member state, with a minimum credit rating of BBB- (or equivalent) from at least one of the main credit rating agencies. Derivatives are subject to guarantees; the section entitled "Contracts as Collateral" contains information on how these work and on their characteristics. It should be noted that these counterparties have no discretionary decision-making powers over the composition or management of the fund's portfolio or over the underlying assets of financial derivative instruments.

SECURITIES WITH EMBEDDED DERIVATIVES

The portfolio manager may invest in securities with embedded derivatives (particularly warrants, convertible bonds, puttable/callable bonds, credit-linked notes, EMTN, subscription certificates, etc.) traded on regulated or over-the-counter Eurozone and/or international markets.

These securities with embedded derivatives allow the portfolio manager to expose the fund to the following risks and instruments, while respecting the portfolio's overall constraints:

- Currencies,
- Fixed income,
- Equities,
- Dividends,
- Volatility and variance (up to 10% of the net assets),
- Commodities (exposure through eligible financial contracts for up to 20% of the net assets),
- ETFs (financial instruments).

STRATEGY FOR USING SECURITIES WITH EMBEDDED DERIVATIVES TO ACHIEVE THE INVESTMENT OBJECTIVE

The portfolio manager may use securities with embedded derivatives, as opposed to the other derivatives mentioned above, to optimise the portfolio's exposure or hedging by reducing the cost of using these financial instruments or gaining exposure to several performance drivers.

The risk associated with this type of investment is limited to the amount invested in its purchase. In all cases, the amounts invested in securities with embedded derivatives, excluding callable/puttable bonds, may not exceed 10% of the net assets.

The fund may also invest up to 100% of its net assets in callable bonds and puttable bonds. These negotiable debt securities have an optional component allowing for early redemption subject to certain conditions (holding

CARMIGNAC PROFIL REACTIF 50

period, occurrence of a specific event, etc.) on the initiative of the issuer (in the case of callable bonds) or at the request of the investor (in the case of puttable bonds).

UCIS AND OTHER INVESTMENT FUNDS

The fund invests:

- Up to 100% of the net assets in units or shares of French or foreign UCITS that invest no more than 10% of their net assets in units or shares of other foreign investment funds, AIFs or UCITS.
- Up to 30% of the net assets in units or shares of French or European AIFs or foreign investment funds that meet the criteria of Article R214-13 of the French Monetary and Financial Code.

The fund may use trackers, listed index funds and exchange traded funds.

The fund invests mainly in funds managed by Carmignac Gestion or an affiliated company.

DEPOSITS AND CASH

The fund may use deposits in order to optimise its cash management and to manage the various subscription or redemption settlement dates of the underlying funds. These trades are made within the limit of 20% of the net assets. This type of transaction will be made on an exceptional basis.

The fund may hold cash on an ancillary basis, in particular in order to meet its redemption obligations in relation to investors.

Cash lending is prohibited.

CASH BORROWING

The fund may borrow cash, in particular to cover investment/disinvestments and subscriptions/redemptions. As the fund is not intended to be a structural borrower of cash, these loans will be temporary and limited to 10% of the fund's net assets.

TEMPORARY PURCHASE AND SALE OF SECURITIES

For efficient portfolio management purposes, and without deviating from its investment objectives, the fund may allocate up to 20% of its net assets to temporary purchases/sales (securities financing transactions) of securities eligible for the fund (essentially equities and money market instruments). These trades are made to optimise the fund's income, invest its cash, adjust the portfolio to changes in the assets under management, or implement the strategies described above. These transactions consist of:

- Securities repurchase and reverse repurchase agreements,
- Securities lending/borrowing.

The expected proportion of assets under management that may be involved in such transactions is 10% of the net assets.

The counterparty to these transactions is CACEIS Bank, Luxembourg Branch. CACEIS Bank, Luxembourg Branch, does not have any power over the composition or management of the fund's portfolio.

Within the scope of these transactions, the fund may receive/give financial guarantees (collateral); the section entitled "Collateral management" contains information on how these work and on their characteristics. Additional information on fees linked to such transactions appears under the heading "Fees and expenses".

Contracts constituting financial guarantees

CARMIGNAC PROFIL REACTIF 50

Within the scope of OTC derivatives transactions and temporary purchases/sales of securities, the fund may receive or give financial assets constituting guarantees with the objective of reducing its overall counterparty risk.

The financial guarantees shall primarily take the form of cash in the case of OTC derivatives transactions, and cash and eligible government bonds in the case of temporary purchases/sales of securities. All financial guarantees received or given are transferred with full ownership.

The counterparty risk inherent in OTC derivatives transactions, combined with the risk resulting from temporary purchases/sales of securities, may not exceed 10% of the Fund's net assets where the counterparty is one of the credit institutions defined in the current regulations, or 5% of its assets in other cases.

In this regard, any financial guarantee (collateral) received and serving to reduce counterparty risk exposure shall comply with the following:

- It shall take the form of cash or bonds or treasury bills (of any maturity) issued or guaranteed by OECD member states, by their regional public authorities or by supranational institutions and bodies with EU, regional or worldwide scope;
- It shall be held by the Custodian of the fund or by one of its agents or a third party under its supervision or by any third-party custodian subject to prudential supervision and which is not linked in any way to the provider of the financial guarantees;
- In accordance with the regulations in force, it shall at all times fulfil liquidity, valuation (at least daily), issuer credit rating (at least AA-), counterparty correlation (low) and diversification criteria, and exposure to any given issuer shall not exceed 20% of the net assets,
- Financial guarantees received in the form of cash shall be mainly deposited with eligible entities and/or used in reverse repurchase transactions, and to a lesser extent invested in first-rate bonds or treasury bills and short-term money market funds.

Government bonds and treasury bills received as collateral are subject to a discount. The management company agrees this contractually with each counterparty.

Risk profile

The fund shall invest in funds and financial instruments selected by the management company. The performance of these funds and financial instruments depends on the evolution and fluctuations of the markets.

The risk profile of the fund is suitable for an investment horizon of over three years.

Like any financial investment, potential investors should be aware that the value of the fund's assets is subject to the fluctuations of the international equity and bond markets and that it may vary substantially. Unitholders receive no guarantee that they will get back the invested capital.

The risk factors described below are not exhaustive. It is up to each investor to analyse the risk associated with such an investment and to form his/her own opinion independent of Carmignac Gestion, where necessary seeking the opinion of any advisers specialised in such matters in order to ensure that this investment is appropriate in relation to his/her financial situation.

a) Interest rate risk: interest rate risk is the risk that the net asset value may fall in the event of a change in interest rates. When the modified duration of the portfolio is positive, a rise in interest rates may lead to a reduction in the value of the portfolio. When the modified duration of the portfolio is negative, a fall in interest rates may lead to a reduction in the value of the portfolio.

b) Equity risk: as the fund is exposed to equity market risk, the net asset value of the fund may decrease in the event of an equity market upturn or downturn.

CARMIGNAC PROFIL REACTIF 50

- c) Risk of capital loss: the portfolio does not guarantee or protect the capital invested. A capital loss occurs when a unit is sold at a lower price than that paid at the time of purchase.
- d) Risk associated with discretionary management: discretionary management is based on the expected evolution of the financial markets. The fund's performance will depend on the companies selected and asset allocation chosen by the management company. There is a risk that the management company may not invest in the best performing companies.
- e) Emerging markets risk: the operating and supervision conditions of these markets may deviate from the standards prevailing on the major international markets, and price variations may be high.
- f) Credit risk: credit risk is the risk that the issuer may default. Should the quality of issuers decline, for example in the event of a downgrade in their rating by the financial rating agencies, the value of the bonds may drop and lead to a fall in the fund's net asset value.
- g) Currency risk: currency risk is linked to exposure – through investments and the use of forward financial instruments – to a currency other than the fund's valuation currency. The fluctuations of currencies in relation to the euro may have a positive or negative influence on the net asset value of the fund. For units denominated in a currency other than the euro, the currency risk linked to fluctuations in the euro versus the valuation currency is residual thanks to systematic hedging. This hedging may generate a performance differential between units in different currencies.
- h) Liquidity risk: the markets in which the fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the fund may be caused to liquidate, initiate or modify its positions.
- i) Risk associated with commodity indices: changes in commodity prices and the volatility of this sector may cause the net asset value to fall. The fund may be exposed to this risk through derivatives with eligible commodity indices as their underlying.
- j) Volatility risk: the increase or decrease in volatility may lead to a fall in net asset value. The fund is exposed to this risk, particularly through derivative products with volatility or variance as the underlying instrument.
- k) Counterparty risk: counterparty risk measures the potential loss in the event of a counterparty defaulting on over-the-counter financial contracts or failing to meet its contractual obligations on temporary purchases or sales of securities. The fund is exposed to it through over-the-counter financial contracts agreed with various counterparties. In order to reduce the fund's exposure to counterparty risk, the management company may establish financial guarantees in favour of the fund.
- l) Risks associated with temporary purchases and sales of securities: the use of these transactions and management of their collateral may carry certain specific risks, such as operational risks and custody risk. Use of these transactions may therefore have a negative effect on the fund's net asset value.
- m) Legal risk: this is the risk that contracts agreed with counterparties to temporary purchases/sales of securities, or over-the-counter forward financial instruments, may be drafted inappropriately.
- n) Risk associated with the reinvestment of collateral: the Fund does not intend to reinvest collateral received, but if it does, there would be a risk of the resultant value being lower than the value initially received.
- o) Sustainability risk: refers to an event or an environmental, social or governance factor that, if it were to occur, could have a significant real or potential impact on the value of investments and, ultimately, on the net asset value of the fund.

✓ Incorporation of sustainability risk into investment decisions

CARMIGNAC PROFIL REACTIF 50

The fund's investments are exposed to sustainability risks, representing a real or potential threat to maximising long-term risk-adjusted rewards. The Management Company has therefore incorporated the identification and assessment of sustainability risks into its investment decisions and risk management processes, through a three-step procedure:

1/ Exclusion: Investments in companies that the Management Company believes do not meet the Fund's sustainability standards are excluded. The Management Company has established an exclusion policy that, amongst other things, provides for company exclusions and tolerance thresholds for business in fields such as controversial weapons, tobacco, adult entertainment, thermal coal production and electricity generation. For more information, please refer to the exclusion policy: https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investment-responsible-4738.

2/ Analysis: the Management Company incorporates an ESG analysis alongside a traditional financial analysis to identify sustainability risks from issuers in the investment universe, covering more than 90% of corporate bonds and equities. Carmignac's proprietary research system, START, is used by the Management Company to assess sustainability risks. For more information, please refer to the ESG incorporation policy at https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investissement-responsible-4738 and to details of the START system: https://www.carmignac.fr/fr_FR/responsible-investment/en-pratique-4692.

3/ Engagement: The Management Company works with issuers on ESG-related matters to raise awareness and gain a better understanding of sustainability risks to portfolios. This engagement may concern a specific environmental, social or governance matter, a long-term impact, controversial behaviour or proxy voting decisions. For more information, please refer to the engagement policy: https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investissement-responsible-4738 and https://www.carmignac.fr/fr_FR/responsible-investment/en-pratique-4692.
Potential impact of sustainability risk on the fund's returns.

Sustainability risks can have adverse effects on sustainability in terms of a significant real or potential negative impact on the value of investments and net asset value of the Fund, and ultimately on investors' return on investment.

There are several ways in which the Management Company may monitor and assess the financial significance of sustainability risks on a company's financial returns:

Environmental: the management company believes that if a company does not take into account the environmental impact of its business and the production of its goods and services, then it may lose natural capital, incur environmental fines, or suffer lower demand for its goods and services. Where relevant, a company's carbon footprint, water and waste management, and supply chain, are therefore all monitored.

Social: The management company believes that social indicators are important in monitoring a company's long-term growth potential and financial stability. These policies on human capital, product safety checks and client data protection are just some of the important practices that are monitored.

Governance: The management company believes that poor corporate governance may present a financial risk. The independence of the board of directors, composition and skills of the executive committee, treatment of minority shareholders, and remuneration, are the key factors studied. Companies' approach to accounting, tax and anti-corruption practices is also checked.

The underlying investments of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.

CARMIGNAC PROFIL REACTIF 50

Target subscribers and investor profile

Units of this fund have not been registered in accordance with the US Securities Act of 1933. They may therefore not be offered or sold, either directly or indirectly on behalf of or for the benefit of a US person, as defined in Regulation S. Furthermore, units of this fund may not be offered or sold, either directly or indirectly, to US persons and/or to any entities held by one or more US persons as defined by the US Foreign Account Tax Compliance Act (FATCA).

Aside from this exception, the fund is open to all investors.

The amount that is appropriate to invest in this fund depends on your personal situation. To determine their level of investment, investors are invited to seek professional advice in order to diversify their investments and to determine the proportion of their financial portfolio or their assets to be invested in this fund relative to, more specifically, the recommended investment period and exposure to the aforementioned risks, their personal assets, needs and own objectives.

The recommended minimum investment period is three years.

Investment policy

Fund commentary

Carmignac Profil Réactif 50 (A EUR Acc units – FR0010149203) delivered a performance of -11.89% in 2022, compared with -14.08% for its reference indicator (30% MSCI AC WORLD (USD, net dividends reinvested) + 70% ICE BofA Global Broad Market Index EUR Hedged. Rebalanced each quarter).

Inflation returned after a decade of absence, with pent-up demand, extraordinary support from financial institutions during the pandemic years and limited supply contributing to prices rises. Swept along by events, central banks were forced to adopt restrictive policies in order to address labour market tensions and persistent inflation drivers. Monetary tightening led to a rapid rise in interest rates, which in turn led to a fall in the bond markets. As a result, the majority of equity markets went off the rails, with the most expensive segments worst affected. This was especially true of growth stocks that had benefited from Covid – energy stood out due to a change in supply and demand dynamics. As recession fears grew over the course of the year, hopes of a central bank pivot fuelled technical rebounds in risk assets. However, the markets were disappointed by the year-end meetings of the US and European central banks. With the threat of recession looming, China finally lifted its zero-Covid policy to support its economic rebound.

2022 was a particularly difficult year for asset managers, amid a simultaneous selloff on the equity and bond markets. Despite having a diversified portfolio, we were adversely affected by exposure to risk assets across our range and recorded a substantial decline over the period. Within our equity component, our exposure to Carmignac Portfolio Grandchildren and Carmignac Portfolio Investissement was detrimental. Within our mixed component, our investment in Carmignac Portfolio Patrimoine proved costly. Within our bond component, Carmignac Portfolio Crédit weighed on performance. Finally, our derivative strategies made a negative contribution.

Financial markets as a whole were down in 2022 with the main indices falling sharply and certain growth sectors faring very badly. However, many equities remain expensive. Despite resilient fundamentals in 2022, we are expecting corporate earnings to be lower in 2023 given the tightening of financial conditions, rise in prices and dip in demand, which could squeeze margins. We prefer companies with relatively little debt and healthy profit margins, and we are trying to diversify portfolios across sectors and countries. After a difficult year for bond markets, yields have become attractive again and suggest an interesting alternative to equities. In light of this, long-term maturities may offer a form of protection against slower growth, while diversification opportunities may be found in emerging markets, especially Latin America.

The fund took no part in any trades covered by ESMA regulations during the year.

CARMIGNAC PROFIL REACTIF 50

Transparency of securities financing transactions and the reuse of financial instruments pursuant to the SFTR in the fund's currency of account (EUR)

The fund took no part in any trades covered by the SFTR during the year.

Regulatory information

Policy for the selection of intermediaries

"In its capacity as management company, Carmignac Gestion selects service providers whose execution policy guarantees the best possible result when executing orders transmitted on behalf of its UCITS or its clients. It also selects service providers to aid in making investment decisions and to execute orders. In both cases, Carmignac Gestion has defined a policy for selecting and evaluating intermediaries according to certain criteria. You can find the updated version of this policy at www.carmignac.com". You will also find a report on intermediary fees on this website.

Extra-financial characteristics

As at 30 December 2022, the financial product was classified under Article 6 of the EU SFDR.

In light of the investment policy implemented, the management company confirms that it does not take adverse sustainability impacts into account at the level of the financial product.

Overall risk calculation method

The method used to determine the fund's overall risk is the relative Value-at-Risk (VaR) method, using a benchmark portfolio as a comparison (the fund's reference indicator is its benchmark portfolio) over a two-year historical horizon, with a 99% confidence threshold over 20 days. The envisaged leverage, calculated as the sum of nominal amounts without netting or hedging, is 200% but may be higher under certain conditions.

Maximum, minimum and average VaR levels over the year are shown in the table below.

As at 30 December 2022, Carmignac Gestion uses relative VaR data in accordance with the overall portfolio risk monitoring methodology.

	VaR 99%, 20 days		
	Min	Average	Max
Carmignac Profil Réactif 50	0.20	0.62	1.33

Remuneration policy

Carmignac Gestion SA's remuneration policy is designed to comply with European and national remuneration and governance rules as set out in the UCITS Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 and 2014/91/EU of 23 July 2014, the ESMA guideline of 14 October 2016 (ESMA/2016/575), and the AIFM Directive 2011/61/EU of the European Parliament and of the Council.

It promotes sound and effective risk management without excessive risk taking. In particular, it ties employees to the risks they take to ensure that Identified Staff are fully committed to the Company's long-term performance.

CARMIGNAC PROFIL REACTIF 50

The remuneration policy was approved by the Board of Directors of the management company. The principles of this policy are re-evaluated at least once a year by the remuneration and nominations committee and Board of Directors, and are adjusted to fit the changing regulatory framework. Details of the remuneration policy, including a description of how remuneration and benefits are calculated, as well as information on the remuneration and nominations committee, can be found at www.carmignac.com. A printout of the remuneration policy is available free of charge upon request.

VARIABLE PART: DETERMINATION AND CALCULATION

Variable remuneration depends on both the individual success of the employee and the performance of the Company as a whole.

The variable remuneration budget is determined on the basis of Carmignac Gestion SA's results over the previous financial year, while ensuring that capital remains at a sufficient level. It is then distributed between the various departments according to the assessment of their performance, and within each department according to employees' individual performance appraisals.

The amount of the variable portion allocated to each employee reflects their performance and the achievement of targets set by the Company.

These targets may be quantitative and/or qualitative and are linked to the employee's position. They take into account individual behaviour to avoid short-term risk taking. They give particular consideration to the sustainability of action taken by the employee and its long-term benefits for the company, the employee's personal involvement and the completion of assigned tasks.

2021 FINANCIAL YEAR

The implementation of the remuneration policy for 2021 has been assessed internally and independently to check compliance with the remuneration policies and procedures adopted by Carmignac Gestion's Board of Directors.

2022 FINANCIAL YEAR

The annual report produced by Carmignac Gestion's Board of Directors is available on the Carmignac website (www.carmignac.com).

2022	
Number of employees	176
Fixed salaries paid in 2022	€13,051,217.29
Total variable remuneration paid in 2022	€37,578,333.26
Total remuneration paid in 2022	€50,629,550.55
> of which risk takers	€37,123,257.99
> of which non-risk takers	€13,506,292.56

CARMIGNAC PROFIL REACTIF 50

Substantial changes during the year

As of 1 January 2022, the portfolio has undergone the following changes:

- Change of reference indicators:

	Old reference indicator	New reference indicator
CPR50	50% MSCI ACWI 50% ICE BofA Global	30% MSCI ACWI 70% ICE BofA Global Broad Market Index

- Calculation of performance fees using a relative method instead of an absolute one.
- Performance fee percentage raised from 10% to 20%.
- Performance fee calculation method brought into line with the ESMA guidelines.

BNP S.A. became the depositary for the portfolio on 1 October 2022 following an intra-group merger.

NOTES TO THE FINANCIAL STATEMENTS OF CARMIGNAC PROFIL REACTIF 50

Accounting methods and rules

The annual financial statements are drawn up in the form required by ANC Regulation 2014-01, as amended.

The general principles of accounting apply:

- a true and fair view, comparability, going concern,
- lawfulness and fairness,
- prudence,
- consistent practice from one financial year to the next.

Income from fixed income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded exclusive of costs.

The accounting currency of the portfolio is the euro.

There are 12 months in the financial year.

Asset valuation rules

Financial instruments are recorded in the financial statements using the historical cost method and are entered on the balance sheet at their current value as determined by the last-known market value or, where a market does not exist, by any external means or by using financial models.

Differences between the current values used to calculate the net asset value and the historical costs of transferable securities when first included in the portfolio are recorded in "valuation differentials" accounts.

Securities that are not denominated in the currency of the portfolio are valued in accordance with the principle described below; the valuation is then converted into the currency of the portfolio on the basis of the exchange rate prevailing on the valuation day.

DEPOSITS:

Deposits with a residual maturity of less than or equal to three months are valued using the straight-line method.

EQUITIES, BONDS AND OTHER SECURITIES TRADED ON A REGULATED OR SIMILAR MARKET:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the last market price of the day.

Bonds and other similar securities are valued at the closing price supplied by various financial service providers.

Interest accrued on bonds and other similar securities is calculated up to the date of the net asset value.

EQUITIES, BONDS AND OTHER SECURITIES NOT TRADED ON A REGULATED OR SIMILAR MARKET:

Securities not traded on a regulated market are valued by the management company using methods based on the market value and the yield, while taking account of recent prices observed for significant transactions.

CARMIGNAC PROFIL REACTIF 50

TRANSFERABLE DEBT SECURITIES:

Transferable debt securities and similar securities that are not traded in large volumes are valued on the basis of an actuarial method, the reference rate (as defined below) being increased, where applicable, by a differential representative of the intrinsic characteristics of the issuer:

- Transferable debt securities with a maturity of less than or equal to one year: Interbank rate in euro (Euribor);
- Transferable debt securities with a maturity exceeding one year: valued using rates for French Treasury bills (BTAN and OAT) with similar maturity dates for the longer durations.

Transferable debt securities with a residual maturity of less than three months may be valued using the straight-line method.

French treasury bills are valued on the basis of market prices, as published daily by the Bank of France or by treasury bill specialists.

FUNDS HELD:

Units or shares of UCIs will be valued at their last-known net asset value.

TEMPORARY TRANSACTIONS ON SECURITIES:

Securities received under repurchase agreements are recorded as an asset under the heading "Receivables on securities received under a repurchase agreement (*pension*)" at the contract amount, plus any accrued interest receivable.

Securities transferred under a repurchase agreement are recorded as securities purchased at their current value. The payables on securities transferred under a repurchase agreement are recorded as securities sold at the value determined in the contract, plus any accrued interest payable.

Securities lent are valued at their current value and are recorded as an asset under the heading "Receivables on securities lent" at their current value, plus any accrued interest receivable.

Securities borrowed are recorded as an asset under the heading "Securities borrowed" at the contract amount and as a liability under the heading "Payables on securities borrowed" at the contract amount, plus any accrued interest payable.

FORWARD FINANCIAL INSTRUMENTS:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the settlement price of that day.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value by discounting future interest payments at the interest rate and/or currency exchange rate prevailing on the market. This price is adjusted to the issuer's risk.

Index swaps are valued using an actuarial method on the basis of a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the terms and conditions determined by the management company.

CARMIGNAC PROFIL REACTIF 50

Off-balance sheet commitments:

Futures contracts are recorded at their market value as off-balance sheet commitments on the basis of the price used in the portfolio.

Options are converted into the underlying equivalent.

Swap commitments are recorded at their nominal value or, where there is no nominal value, at an equivalent amount.

Management fees

Management fees and operating costs cover all the charges relating to the UCI: investment, administrative, accounting, custody, distribution, audit fees, etc.

These fees are recorded in the UCI's income statement.

Management fees do not include transaction fees. Please refer to the prospectus for further details on the charges actually invoiced to the UCI.

They are recorded on a pro-rata basis each time the net asset value is calculated.

The combined total of these fees respects the limit of the net assets, as specified in the prospectus or fund rules: FR0010149203 – A EUR Acc units: Maximum of 1.50% inclusive of tax.

Performance fee:

The performance fees are based on a comparison between the performance of each fund unit (except unhedged units) and the reference indicator over the financial year. Regarding unhedged units, performance fees are calculated on the basis of the unit's performance compared with that of the reference indicator converted into the currency of the unit.

The Fund's reference indicator is the following composite index: 30% of the MSCI AC WORLD NR USD converted into euro (Bloomberg code: NDUEACWF) + 70% of the ICE BofA Global Broad Market Index EUR hdg (Bloomberg code: GBMI).

If the performance since the beginning of the financial year exceeds the performance of the reference indicator and if no past underperformance still needs to be offset, a daily provision of up to 20% of this outperformance is established. In the event of underperformance in relation to this index, a daily amount corresponding to a maximum of 20% of this underperformance is deducted from the provision established since the beginning of the year. For the A and E units, the applicable rate for the performance fee is 20%. Any underperformance of the unit class against the reference indicator over the five-year reference period or since launch (whichever period is shorter) is made up before a performance fee becomes payable. If another year of underperformance occurred within this first five-year period and it was not made up at the end of this first period, a new period of a maximum of five years begins from this new year of underperformance. The fund's performance is represented by its gross assets, net of all fees, before provision of the performance fee and taking into account subscriptions and redemptions. The performance fee may also be payable if the unit outperformed the reference indicator but posted a negative performance. If the fund is eligible for the booking of a performance fee, then:

o in the event of subscriptions, a system for neutralising the volume effect of these units on the performance fee is applied. This involves systematically deducting the share of the performance fee actually booked as a result of these newly subscribed units from the daily provision;

o in the event of redemptions, the portion of the performance fee provision corresponding to redeemed shares is transferred to the management company under the crystallisation principle.

The performance fee is paid to the management company in full at the end of the financial year.

Allocation of distributable income

DEFINITION OF DISTRIBUTABLE INCOME

Distributable income is made up of:

NET INCOME:

The net income for the financial year is equal to the amount of interest, arrears, premiums and prizes, dividends, director's fees and any other income relating to the securities constituting the portfolio, plus income generated by temporary cash holdings and minus the amount of management fees and interest charges on loans. This is increased by retained earnings, plus or minus the balance of the income equalisation accounts.

CAPITAL GAINS AND LOSSES:

Realised capital gains, net of fees, minus realised capital losses, net of fees, recognised during the financial year, plus net capital gains of a similar nature recognised during previous financial years and which have not been distributed or accumulated, plus or minus the balance of the capital gains equalisation account.

ALLOCATION OF DISTRIBUTABLE INCOME:

Unit(s)	Allocation of net income	Allocation of net realised capital gains or losses
A EUR Acc units	Accumulation	Accumulation
